## Irrelevant Hotels Displayed in Search Results Despite Selected Filters

Attach Add a child issue Link issue ...

Description *Irrelevant Hotels Appearing in Search Results with Selected Filters*

Environment:

Browsers:

Google Chrome Version 119.0.6045.160

Firefox Version 119

Device: Windows 10

STR:

1. Open the Agoda website in Google Chrome.
2. Enter a specific location, dates, and quantity of persons and click the search button.
3. Apply additional filters in the search result list, including "breakfast included," "50% discount," and "highest rating."
4. Review the search results and identify hotels that do not align with the selected "breakfast included" filter.

Irrelevant Hotel Listing in Search Results

Attach Add a child issue Link issue ...

Description Environment:

Browsers: Google Chrome Version 119.0.6045.160

Firefox Version 119

Device: Windows 10

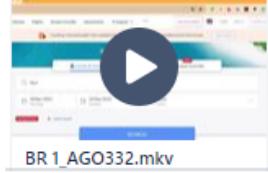

STR:

1. Open the Agoda website in Google Chrome.
2. Enter a specific location in the search bar.
3. Review the search results, and identify the irrelevant hotel listing.
4. Attempt to proceed with booking for the displayed irrelevant hotel.

Expected result: Search results should only display relevant hotels that are available for booking.

Actual result: An irrelevant hotel, which is not available for booking, is displayed alongside the relevant search results.

Cost Displayed for 1 Day Instead of Entire Reservation Period

Attach Add a child issue Link issue ...

Description • Unsaved changes

Environment:

Browsers: Google Chrome Version 119.0.6045.160

Firefox Version 119

Device: Windows 10

STR:

1. Open the Agoda website in Google Chrome.
2. Enter a specific location in the search bar.
3. Review the search results and pay attention to the displayed cost for each hotel.
4. Observe that the cost is shown for 1 day instead of representing the entire reservation period.

Expected result: The cost displayed in the search results should reflect the total amount for the entire reservation period, not just the cost for a single day.

Actual result: The displayed cost for each hotel in the search results only represents the cost for a single day, leading to potential confusion for users regarding the total expense of the reservation.

AGODA\_website Software project You're on the Free plan **UPGRADE**

Language Inconsistency on About Agoda Page

Attach Add a child issue Link issue ...

Description  
Environment:  
Browsers:  
Google Chrome Version 119.0.6045.160  
Firefox Version 119  
Device: Windows 10

STR:  
1. Open [About Agoda » Agoda: See The World For Less](#)  
2. Observe that the content of the About Agoda page is displayed only in English.  
3. Compare this with the homepage (<https://www.agoda.com/>), which is available in multiple languages.  
4. Verify that language options, if any, on the About Agoda page are not functioning as expected.

Expected result: The language of the About Agoda page should be consistent with the language options available on the Agoda homepage. If the homepage is available in multiple languages, the About Agoda page should reflect the same language choices.

Actual result: The About Agoda page is only available in English, while the Agoda homepage supports multiple languages.

Language Mismatch in Public Relations Page when Switching to Arabic

Attach Add a child issue Link issue ...

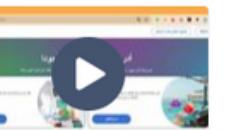

Description  
Environment:  
Browsers:  
Google Chrome Version 119.0.6045.160  
Firefox Version 119  
Device: Windows 10

STR:  
1. Open the Agoda Homes page at [Agoda Homes: List Your Home and Earn Extra Income, Today!](#)  
2. Change the language to Arabic using the language switcher.  
3. Navigate to the footer of the page.  
4. Click on the "Public Relations" link.

Expected result: The Public Relations page should open in Arabic since the language was switched to Arabic on the main page.

Actual result: The Public Relations page opens in English instead of Arabic, despite the language being set to Arabic on the main page.

## Inability to Reset Search Field on Agoda Home Page

Attach Add a child issue Link issue ...

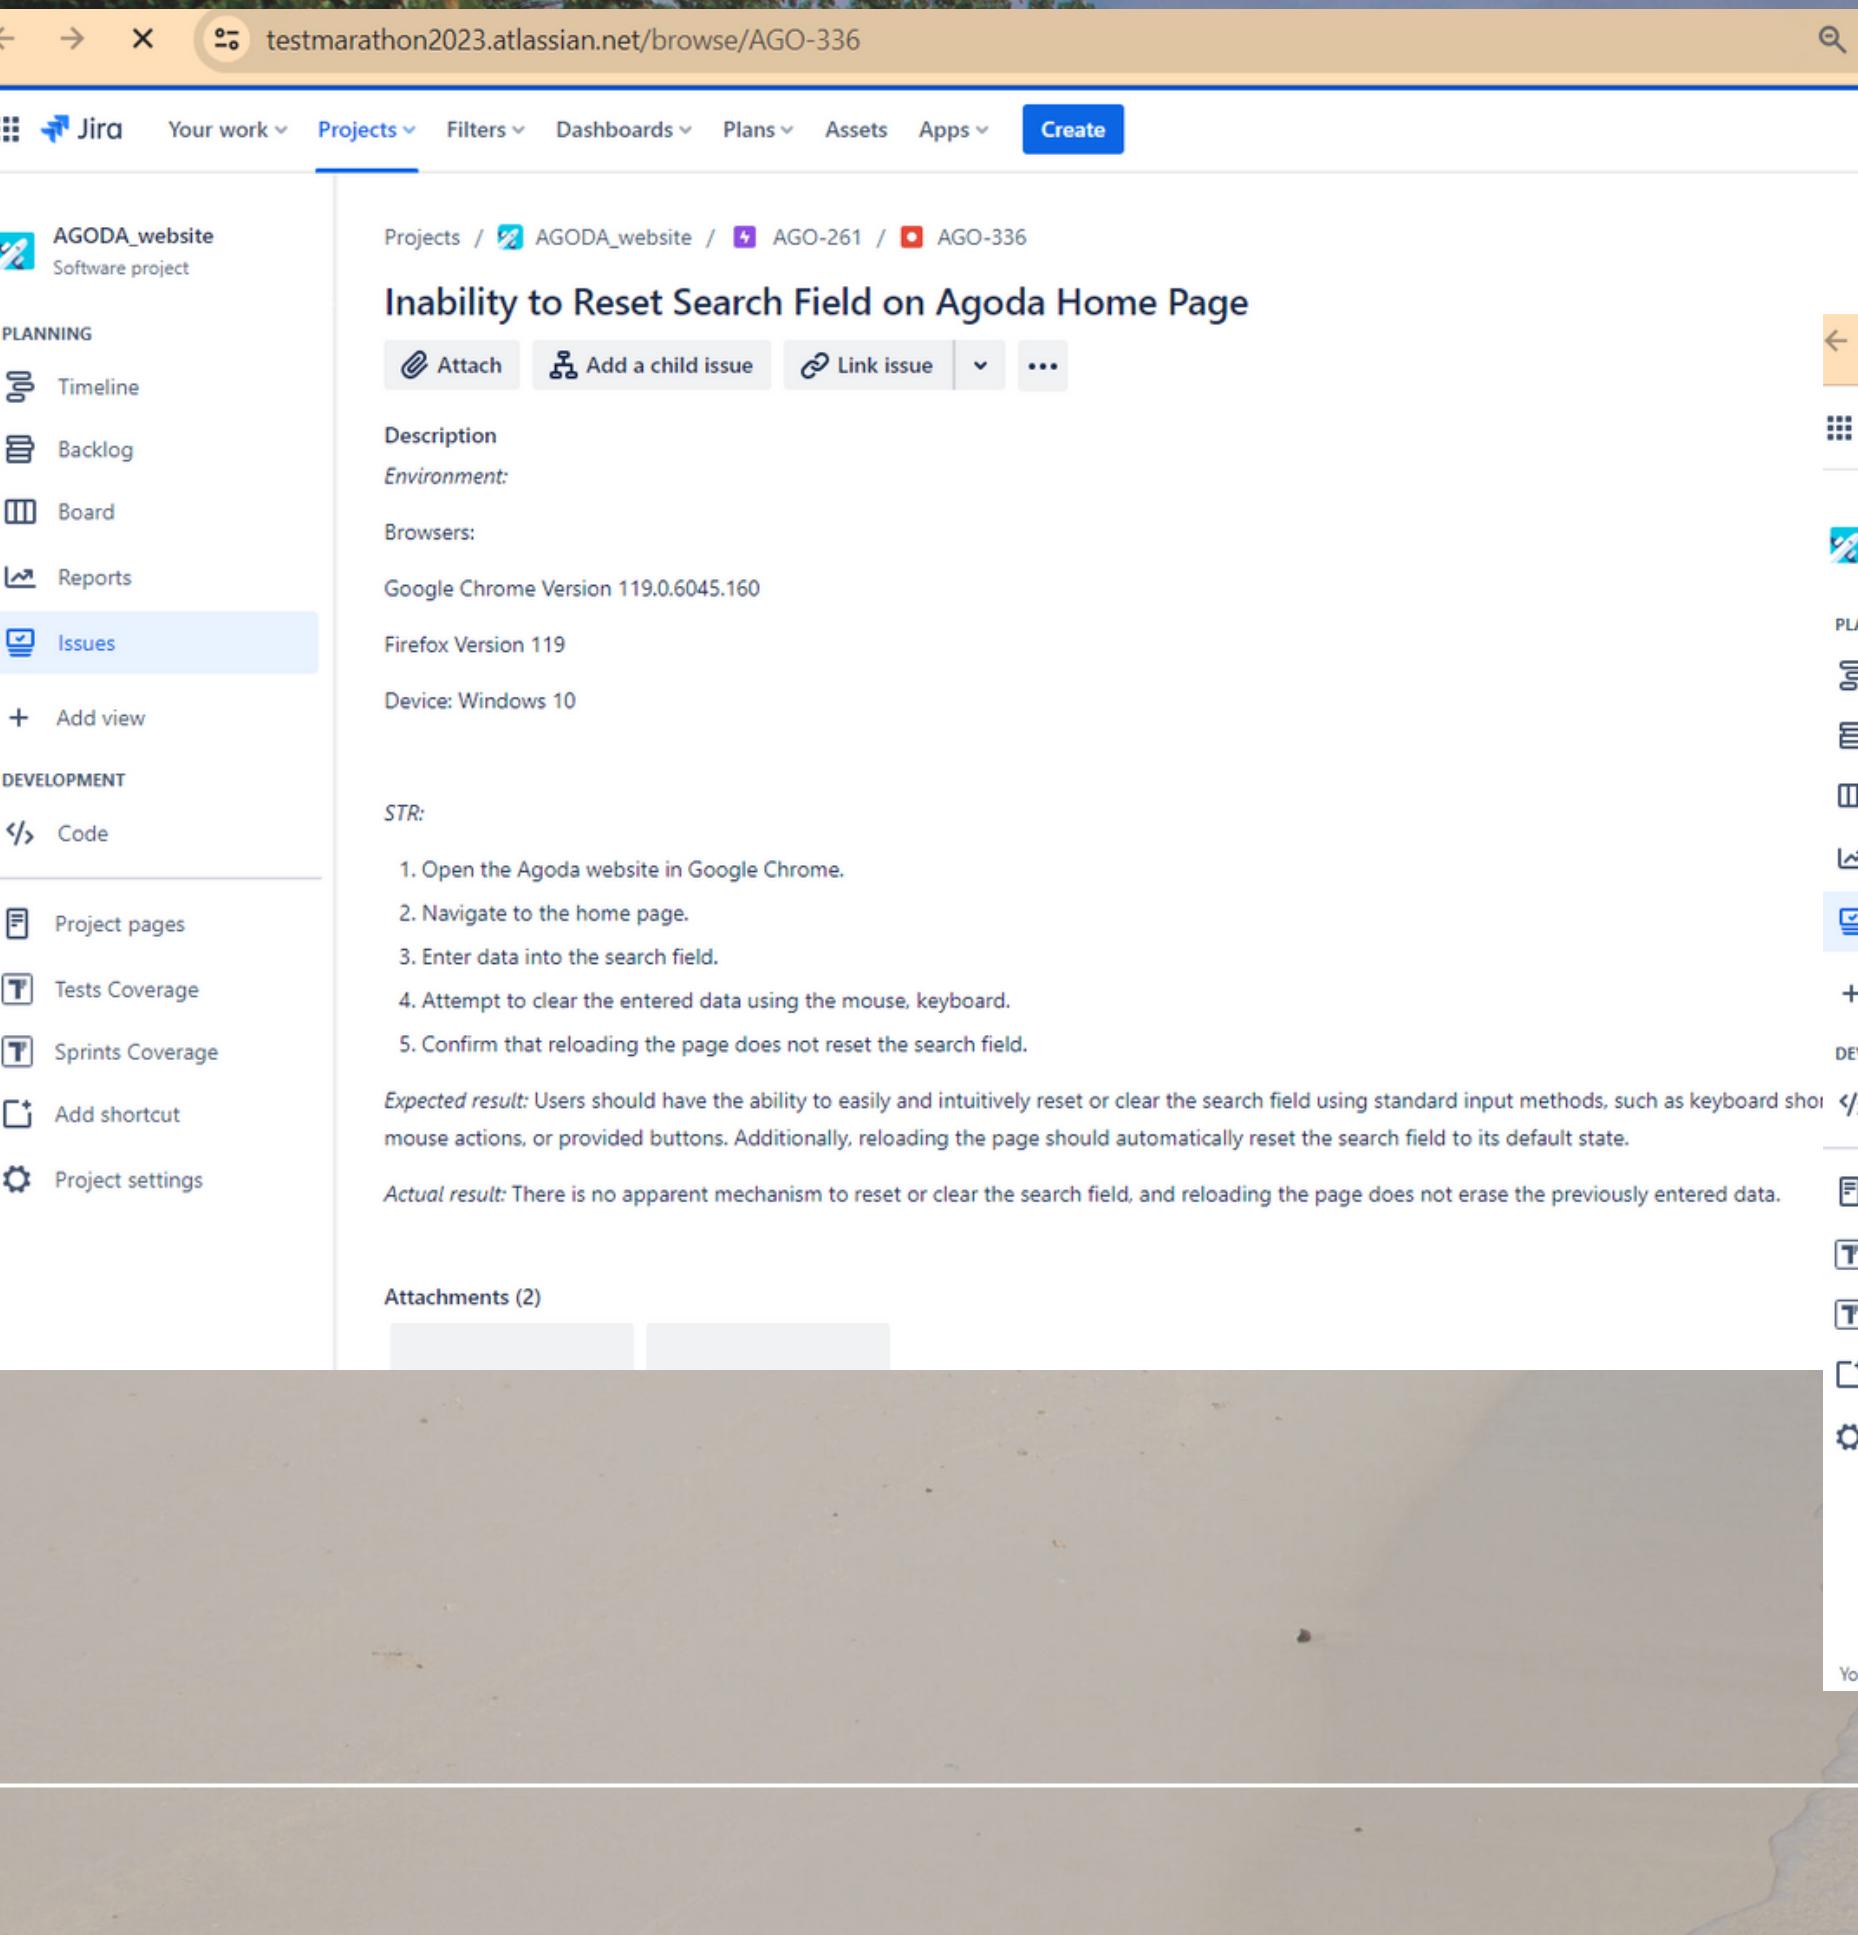

Description  
Environment:  
Browsers:  
Google Chrome Version 119.0.6045.160  
Firefox Version 119  
Device: Windows 10

STR:  
1. Open the Agoda website in Google Chrome.  
2. Navigate to the home page.  
3. Enter data into the search field.  
4. Attempt to clear the entered data using the mouse, keyboard.  
5. Confirm that reloading the page does not reset the search field.

Expected result: Users should have the ability to easily and intuitively reset or clear the search field using standard input methods, such as keyboard short mouse actions, or provided buttons. Additionally, reloading the page should automatically reset the search field to its default state.

Actual result: There is no apparent mechanism to reset or clear the search field, and reloading the page does not erase the previously entered data.

## 404 Error When Changing Language from Arabic to English on Homes Page

Attach Add a child issue Link issue ...

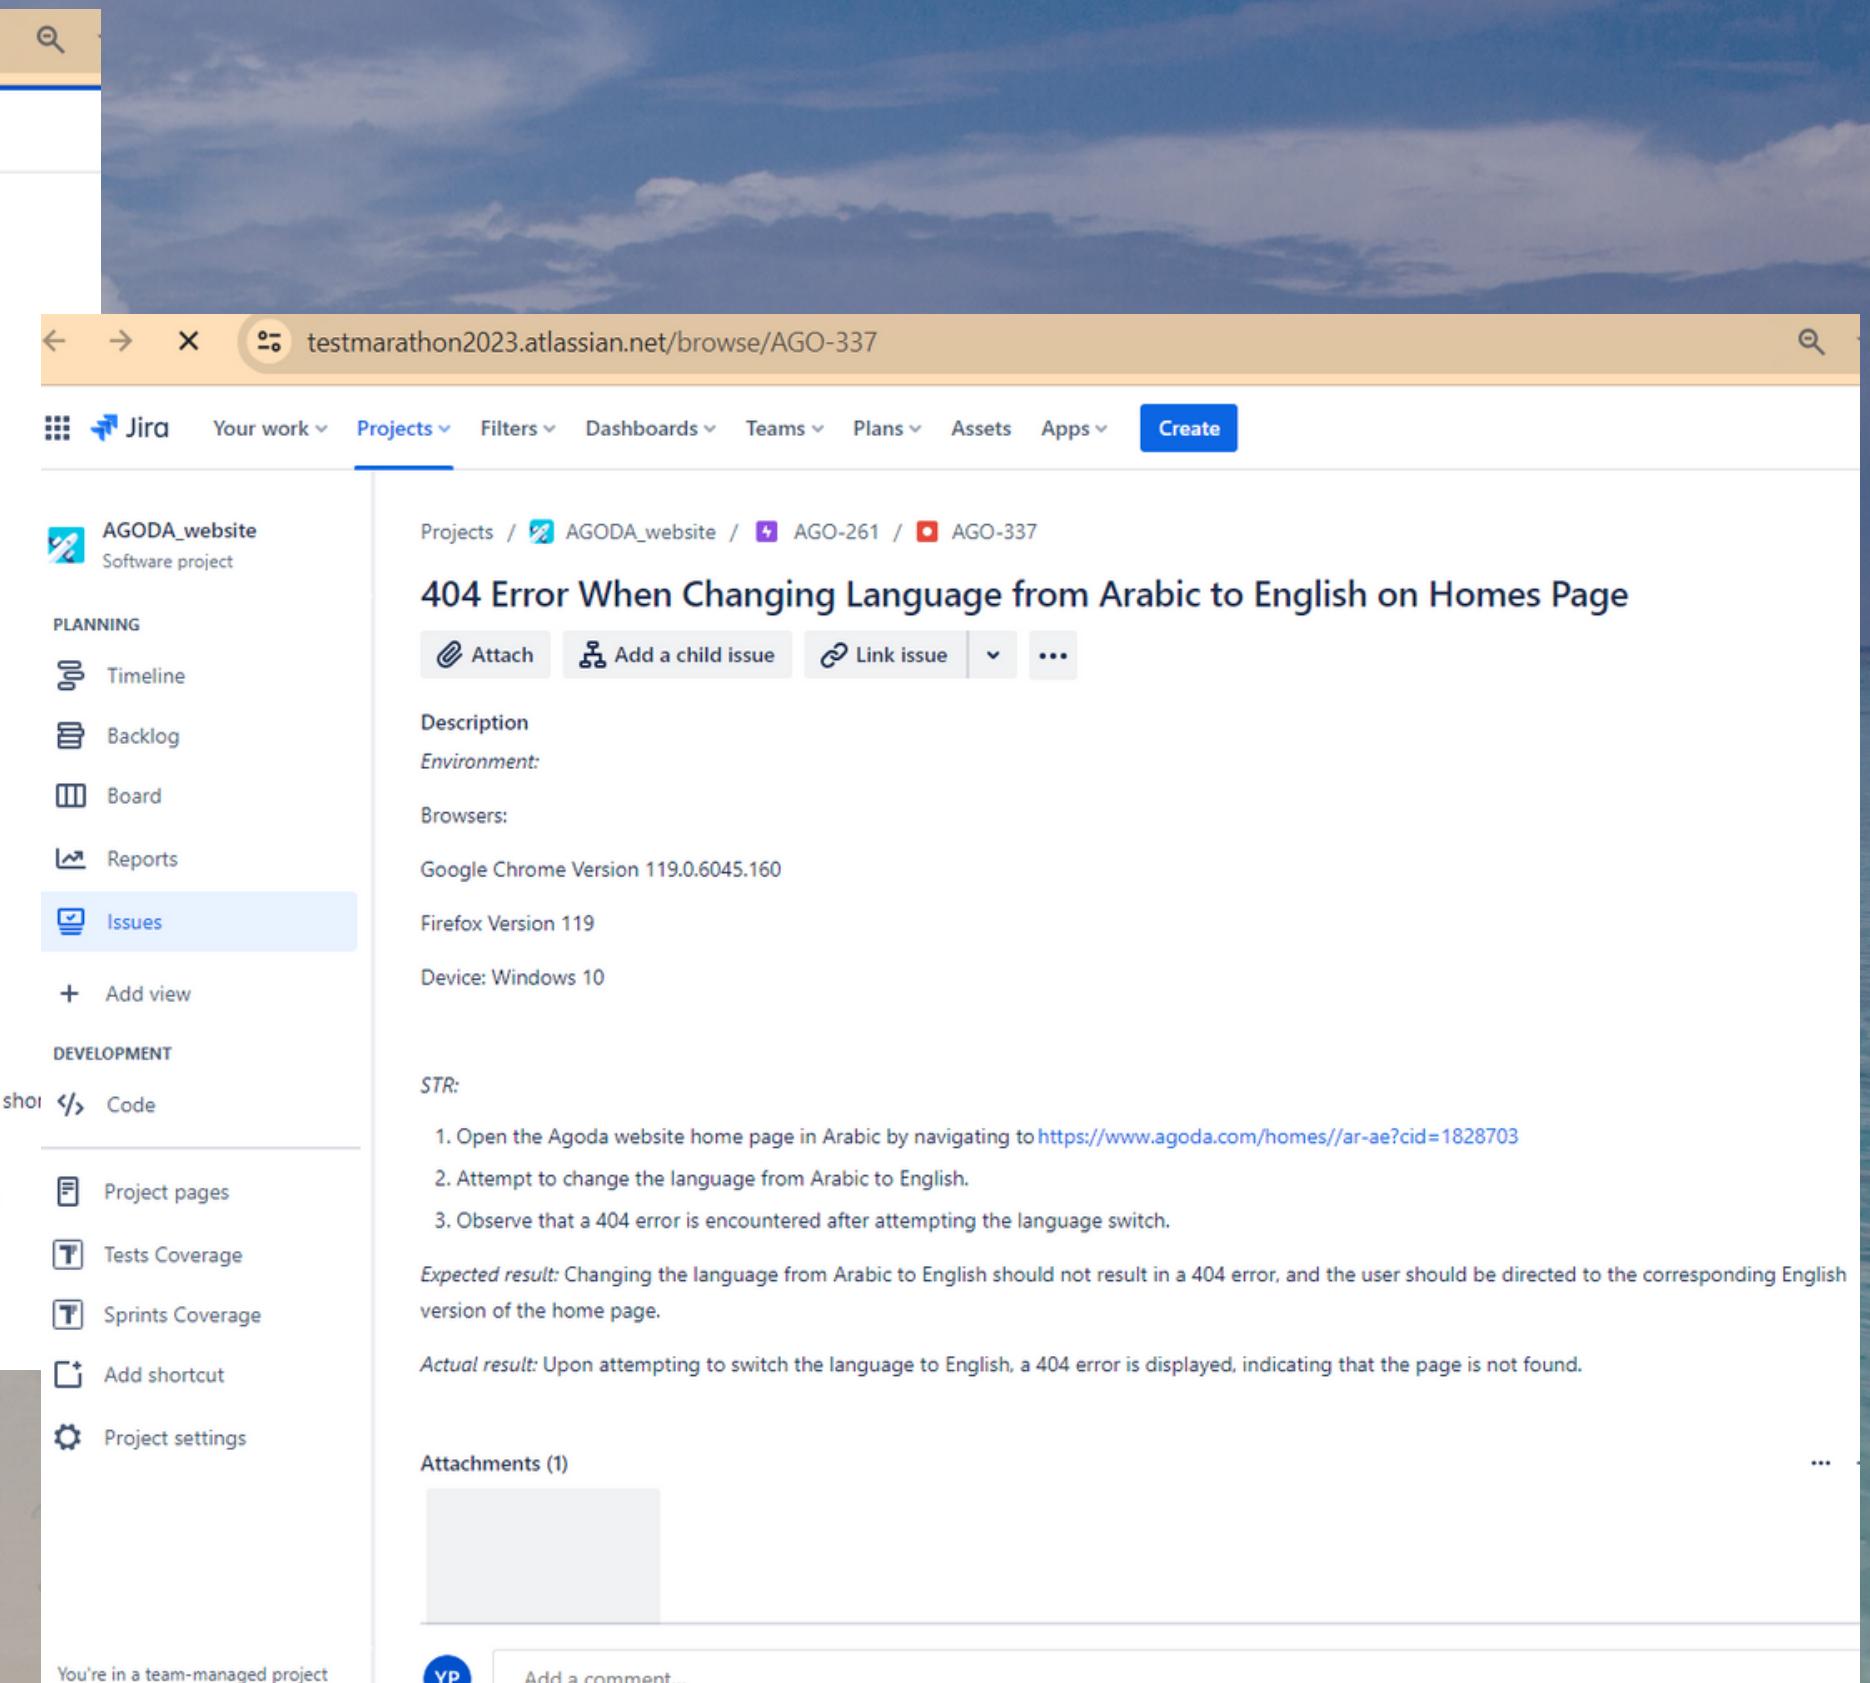

Description  
Environment:  
Browsers:  
Google Chrome Version 119.0.6045.160  
Firefox Version 119  
Device: Windows 10

STR:  
1. Open the Agoda website home page in Arabic by navigating to <https://www.agoda.com/homes//ar-ae?cid=1828703>.  
2. Attempt to change the language from Arabic to English.  
3. Observe that a 404 error is encountered after attempting the language switch.

Expected result: Changing the language from Arabic to English should not result in a 404 error, and the user should be directed to the corresponding English version of the home page.

Actual result: Upon attempting to switch the language to English, a 404 error is displayed, indicating that the page is not found.

## Inability to Manually Enter Number of People on Home Page

Attach Add a child issue Link issue ...

Description

Environment:

Browsers:

Google Chrome Version 119.0.6045.160

Firefox Version 119

Device: Windows 10

STR:

1. Open the Agoda website in Google Chrome.
2. Navigate to the home page.
3. Locate the section for entering the number of people for a booking.
4. Attempt to manually enter the required number using the keyboard.

Expected result: Users should be able to manually enter the required number of people in addition to using the increase and decrease buttons.

Actual result: There is no text input field for users to manually enter the number of people; only increase and decrease buttons are provided.

testmarathon2023.atlassian.net/browse/AGO-340

Jira Your work Projects Filters Dashboards Teams Plans Assets Apps Create

AGODA\_website Software project You're on the Free plan UPGRADE

Lack of Dynamic Validation for Child Age on Homepage Search

Attach Add a child issue Link issue ...

Description Environment:

Browsers:

- Google Chrome Version 119.0.6045.160
- Firefox Version 119

Device: Windows 10

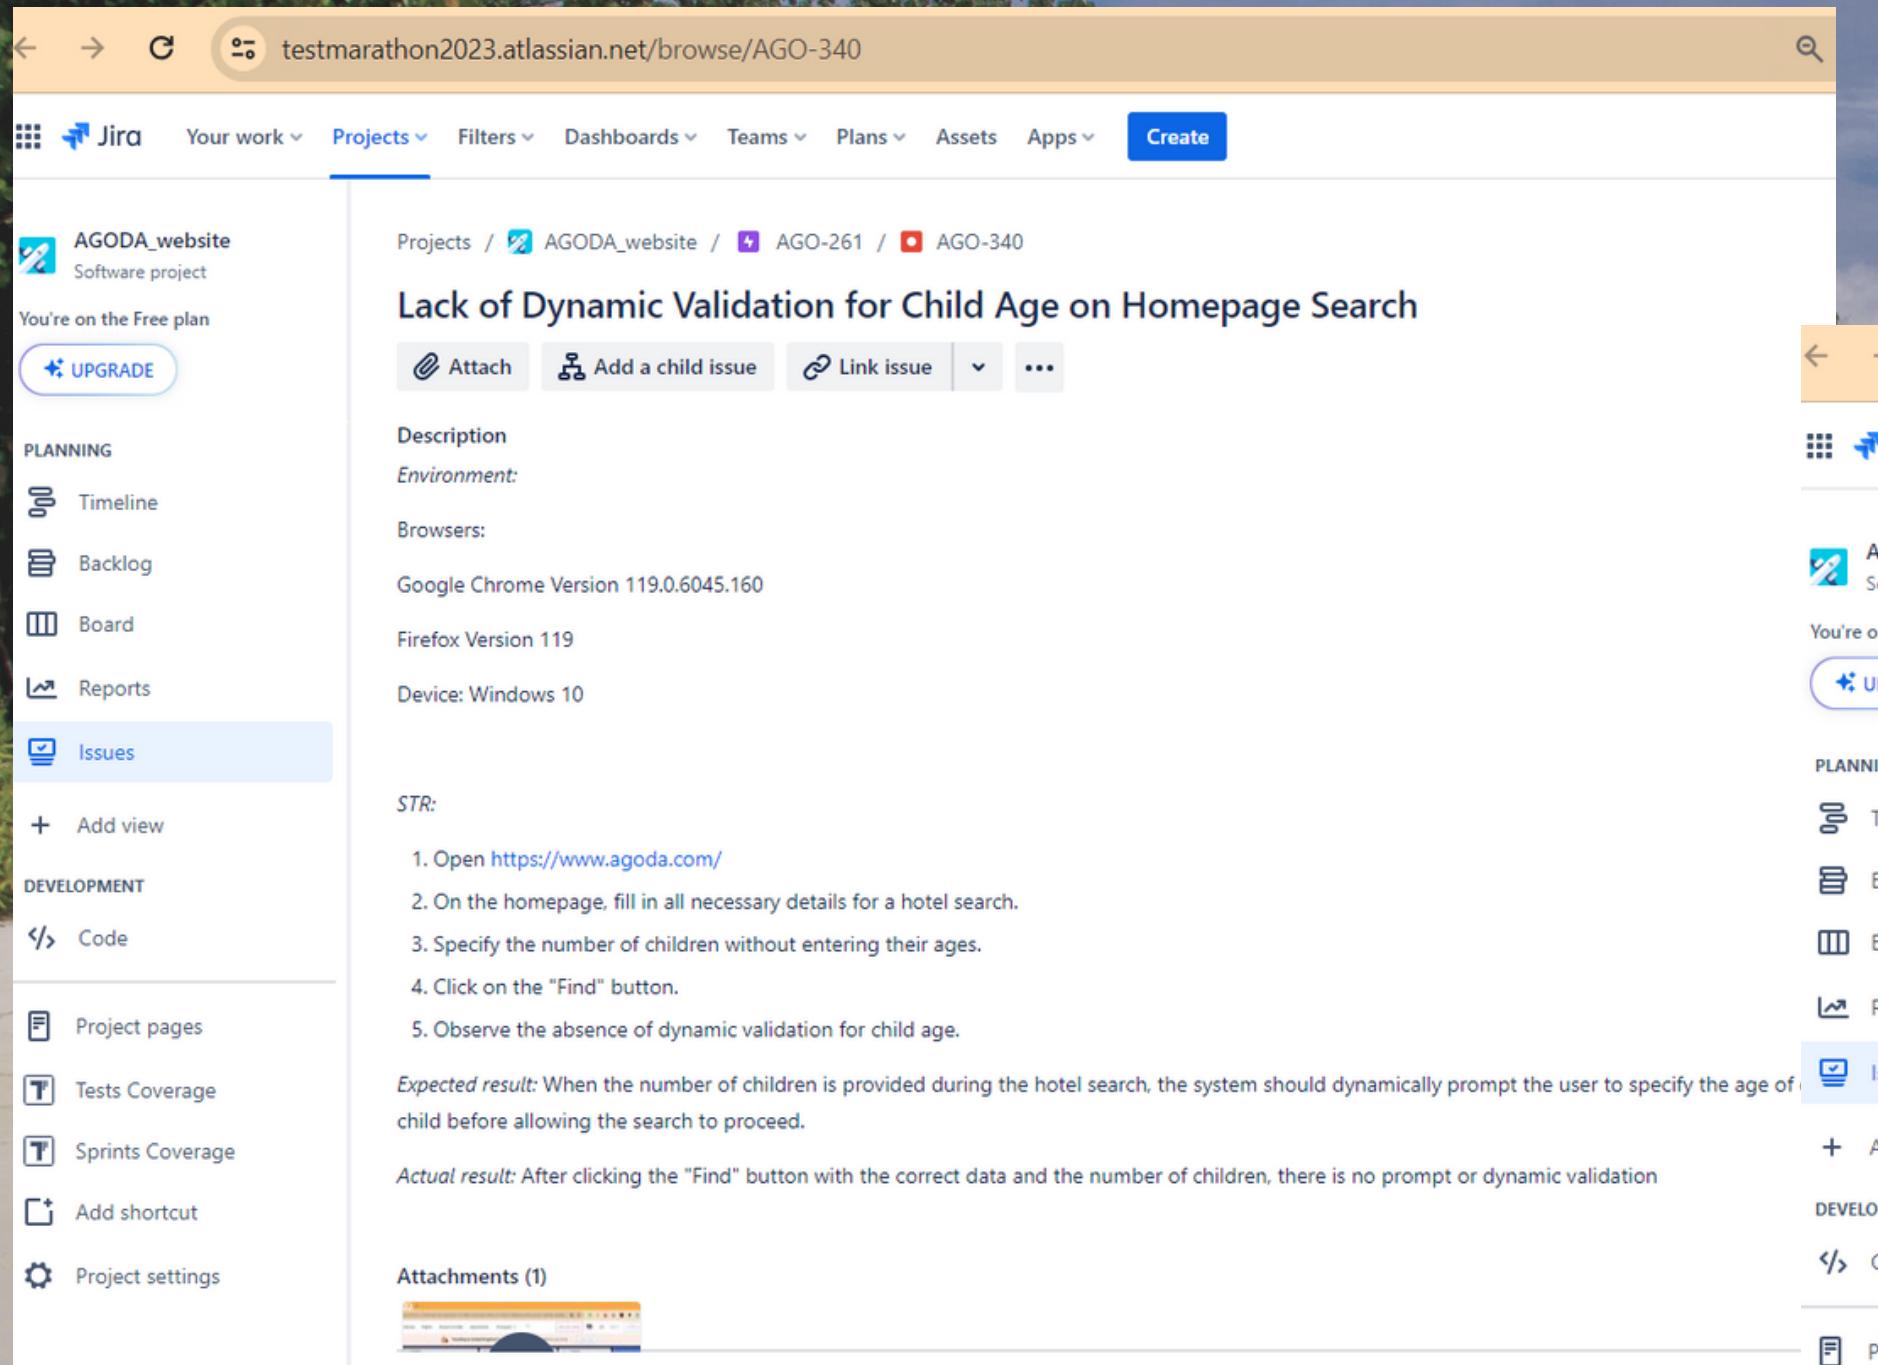

STR:

1. Open <https://www.agoda.com/>
2. On the homepage, fill in all necessary details for a hotel search.
3. Specify the number of children without entering their ages.
4. Click on the "Find" button.
5. Observe the absence of dynamic validation for child age.

Expected result: When the number of children is provided during the hotel search, the system should dynamically prompt the user to specify the age of child before allowing the search to proceed.

Actual result: After clicking the "Find" button with the correct data and the number of children, there is no prompt or dynamic validation.

## Irrelevant Hotels Displayed in Search Results Despite Selected Filters

Attach Add a child issue Link issue ...

Description

*Irrelevant Hotels Appearing in Search Results with Selected Filters*

Environment:

Browsers:

Google Chrome Version 119.0.6045.160

Firefox Version 119

Device: Windows 10

STR:

1. Open the Agoda website in Google Chrome.
2. Enter a specific location, dates, and quantity of persons and click the search button.
3. Apply additional filters in the search result list, including "breakfast included," "50% discount," and "highest rating."
4. Review the search results and identify hotels that do not align with the selected "breakfast included" filter.

*Expected result:* When selecting filters like "breakfast included," the search results should only display hotels that meet this criterion, ensuring accuracy in the filtering process.

*Actual result:* Irrelevant hotels, which do not offer breakfast, are displayed in the search results despite selecting the "breakfast included" filter.
